

CareSign

A digital signage solution for patient rooms and clinics

Why Hospitals Need CareSign

Pain Points

Traditional paper or static signage in hospitals creates inefficiencies and risks:

Outdated Information

Manual paper updates are slow, inconsistent, and error-prone.

Fragmented Branding

Hospitals lack unified, professional signage that reflects their identity.

Patient & Visitor Confusion

Families often don't know if the patient is present, under isolation, or available for visits.

Limited Flexibility

No way to push seasonal content (awareness campaigns, national celebrations, health education).

Staff Overload

Doctors and nurses waste time answering repetitive questions about schedules, room status, or visiting hours.

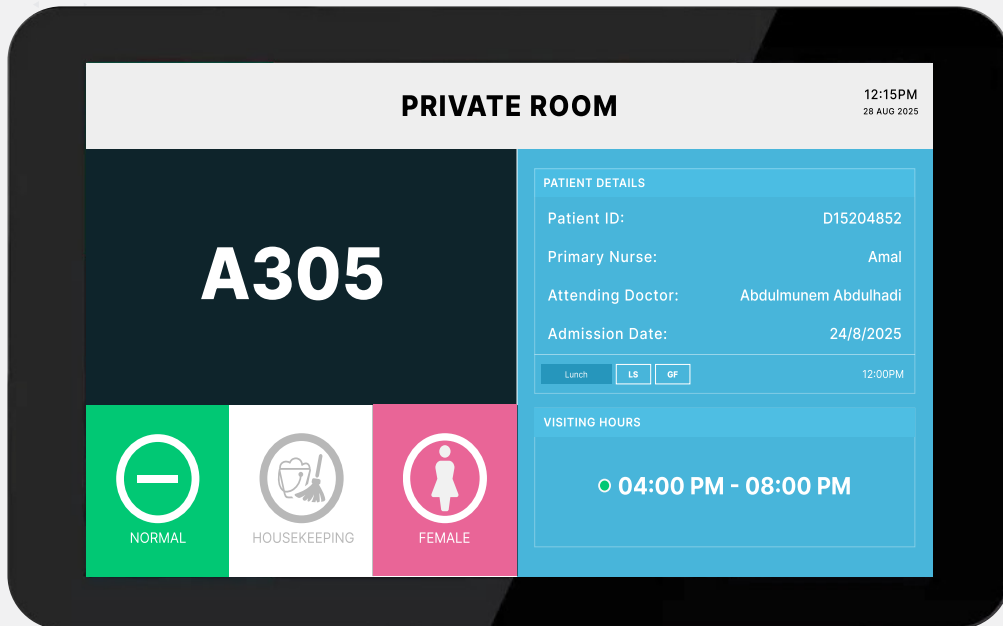

Poor Emergency Response

Static signs can't adapt quickly to reflect urgent changes like visitor restrictions or isolation requirements.

What CareSign Delivers

Key Advantages

- 01 Unified Digital Signage**
A consistent, professional look across the hospital.
- 02 Real-Time Integration**
Updates automatically from HIS, queue systems, and patient bedside — no manual work.
- 03 Clinic Flow Management**
Real-time queues and attending doctor updates
- 04 Patient Request Visibility**
Requests submitted from the bedside system (e.g., housekeeping, amenities) appear on the door display, making them visible to care teams.
- 05 Visitor/Care Teams Guidance**
LED side indicators (green = available, red = not available/isolation).
- 06 Scalable & Customizable**
Hospitals can adjust templates, branding, and actions per their needs.
- 07 Awareness & Marketing Channel**
Seasonal or campaign content (e.g., Breast Cancer Month, Alzheimer's Day, National Day) can be pushed directly to signage.

System Features

Integration with HIS, Queue and Patient Bedside Systems

Room and clinic door displays with live patient, doctor, and status info.

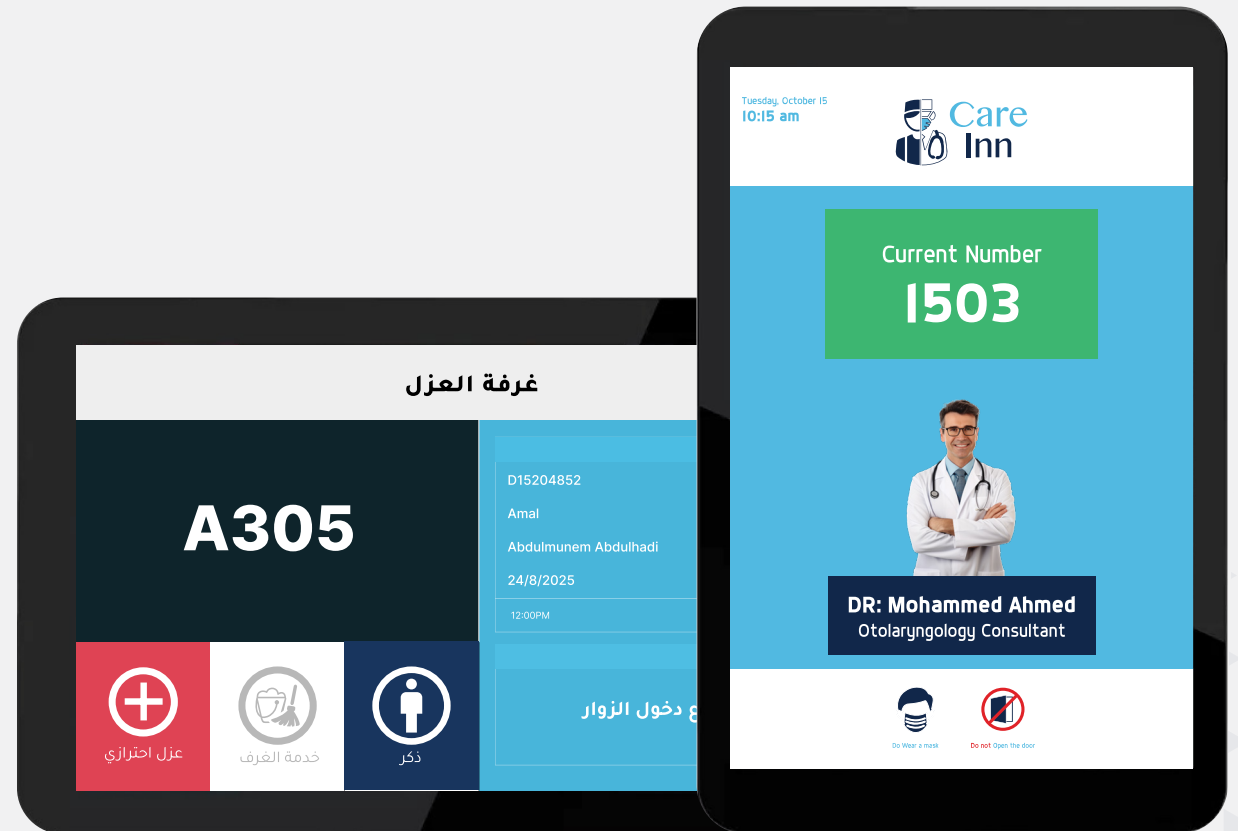

Indicators for isolation, gender, availability, housekeeping, etc.

Automated diet codes and admission details display.

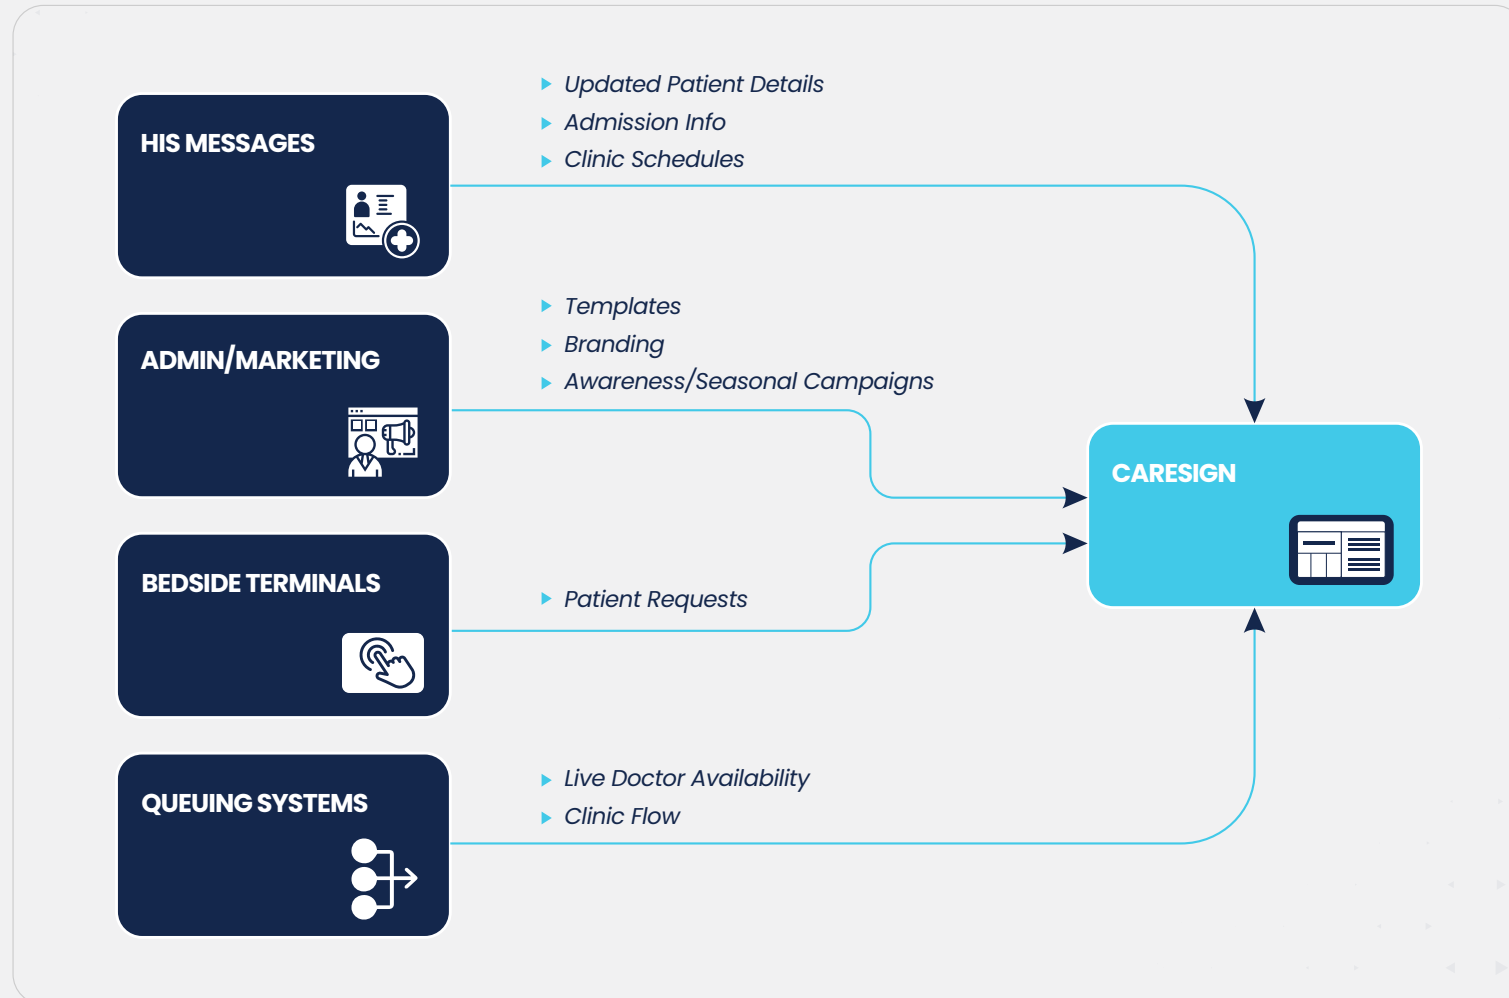

Multilingual support (Arabic/English).

Dynamic content management for awareness campaigns and hospital branding.

Scalable, future-proof architecture.

System Flow

Benefits by Stakeholder

For Administrators

Centralized dashboard to manage all signage hospital-wide.

Unified branding and professional image.

KPIs on system uptime, update frequency, and content scheduling

Customizable templates per department or ward.

For Doctors & Nurses

No need for manual paper replacement.

Automatic clinic schedules and patient flow updates.

Queue system integration for outpatient clinics.

Quick visibility of patient status and their pending requests outside rooms.

For Patients

Requests made through bedside terminals are visible to staff outside.

Clear visiting hours and isolation indicators improve comfort and safety.

For Visitors

Easy visibility of room status and patient availability.

Clear visiting hours, restrictions, and indicators reduce confusion.

Less reliance on staff for basic questions.
